SILVER SLICE. GOLDEN SUNBEAM. SPANISH CAKE. RAISIN POUND.

SOMETHING NICE FOR BREAKFAST.

Why, yes, ma'am, here is some splendid bacon. It is wonderfully toothsome, mild, sweet and as healthful as anything you could eat. NO MA'AM it isn't just the same as the rest—Quite a bit different. This Bacon started to be good before it was Bacon, the breeding you know, then the feeding. Cured more carefully than most Bacons, too. Really, we don't think you will be able to find anything anywhere QUITE so nice for breakfast. 36cts a pound sliced.

Hudson, Hughes & Farnau.

Why not get from 10,000 to 15,000 miles out of your tires? See the Arcade Garage about it.

Our flour is not adulterated. It is guaranteed to please you. The price is right. Hudson, Hughes & Farnau.

FOR RENT—My house and three acres of land, just out of town limits. Possession given at any time.

G. P. Terrill. Phone 129.

The meeting at Sycamore Valley closed Saturday night which was conducted by Rev. Frank Tindler, Jr., with one addition, and splendid services each night.

It is just as unnecessary to throw away your automobile tires, as it is to throw away your shoes after the first sole wears out. Have them vulcanized at the Arcade Garage.

FOR SALE.

Rex Theatre and Garage

7-13-41 pd L. E. Herron.

LARGE CUCUMBER.

Mr. S. W. Halcomb of Bryantsville, presented us with a cucumber weighing two pounds and measuring eighteen inches.

WANTED.

We wish to buy a copy of a History of Kentucky, by Perrin, Battle and Kniffen, and published by Battey and Co., Louisville. Anyone desiring to sell such a copy, call at RECORD office.

SEVERE STORM.

A severe wind and hail storm visited the county Tuesday afternoon, and inflicted serious damage on crops. Several tobacco growers have reported hail losses and in some instances, the hail was so severe as to damage corn.

BACK ISSUES WANTED.

Will some of our good readers kindly furnish us with a few copies of the Central Record of June 22nd and July 13th date. We have exhausted our supply and need these two issues badly to complete our files.

PAINT LICK WINS AGAIN.

The second team at Paint Lick defeated the first team of Silver Creek on the formers grounds last Saturday by a score of 13 to 9. The first Paint Lick team also defeated by an enormous score the Railroad team at Danville on that day. This was played on the fatters ground.

BUY FINE CATTLE.

Messrs A. T. Sanders and John Milley Amon have recently purchased a herd of five Aberdeen-Angus cattle from the Long Stock Farm at Shepherdsville. These cattle are from the latest strain from Scotland, and among them is a male calf, whose sire and dam are both champions, and have never lost in a show. The price paid for the herd was \$1800.

ANTIOCH SUNDAY SCHOOL.

Sunday July 23rd our school had 110 in attendance, and has been running around this number for some time. Most of the community has become enlisted in the work. On the 23rd six came forward to confess Christ as their Saviour. A series of meetings will begin Sunday evening, July 30th at 7:30 o'clock. I have never seen better conditions to receive a great blessing. Everybody invited to come, come praying that the Lord may give us a great blessing and to him the all the glory.

J. F. Holtzman, Sup't.

METCALF ON STAND.

A dispatch from Noblesville, Ind., this week said: R. H. Metcalf, of Paint Lick, Ky., on trial here, charged with having accepted a check for \$6,700 while President of the Farmers and Merchant's Bank of Cleo when, it is alleged, he knew the institution to be insolvent, will go on the stand this week in his own behalf, the attorney announced. "I am going to how close to the line, let the chips fall where they may," the defendant said. "I am going to tell the truth. I won't attempt to shield myself, and certainly will not shield those who are responsible for this condition."

EXTENSIVE IMPROVEMENTS.

The Arcade Garage under the management of the Kinnaird Brothers is making extensive improvements in the way of building and equipment. They are now adding a forty feet addition to their present quarters, which will make room for their Vulcanizing machine which will be installed this week. This will be run by Rey Whittom, an expert mechanic, who has been working in the last few years at the Humptree factory at Detroit. This machine will repair casings of all sizes and the Garage guarantees that vulcanized patches will outlast other parts of the tire. They have also installed a free air tank with tubing running to the street.

We will buy your wheat, store it, or exchange it for First Patent Flour.

Hudson, Hughes & Farnau.

The President of the Womans Club request that every member meet at the Club Room on Friday afternoon at four o'clock.

DANVILLE FAIR.

The Danville Fair begins next Wednesday and needless to say, it will be attended by many people from this county, as in former years. They have offered a fine premium list and with other attractions will insure a fine and successful Fair.

HARRODSBURG FAIR ON.

Good crowds from Lancaster and Garrard county are attending the Mercer county fair at Harrodsburg this week. No better county fair is ever held in the state and we predict a record breaker this year. Smittle's band so well known here, will furnish the music.

BIG LUMBER DEAL.

Messrs Sib Substitution, Lewis Murphy and Floyd Humphrey have recently purchased of Mrs N. Dean of Jessamine county, one hundred and twenty-nine white oak trees at a total cost of \$1,400. These trees will average about 1400 feet to the tree and have been sold to J. D. Hughes, at High Bridge, for \$20. a thousand feet.

MRS. GILL'S WILL PROBATED.

The will of Mrs. Pattie Duncan Gill was admitted to probate in the county court here last Monday. The will was dated April 12th, 1904 and was written in her own hand. After all her just debts are paid, she bequeaths to her only daughter, Mrs. Juliet Barnard, the remainder of her entire estate and makes her the sole executrix without bond.

BALLOTS BEING PRINTED.

This office has just received the official order from the County clerk to print the official ballots for the primary election which takes place next Saturday week, August the fifth. The Democratic ballot will contain the names of Hon. Harvey Helm and Senator Chas Montgomery, candidates for the nomination for congress from the eighth district. The Republican ballot will have two candidates also to choose from and the race on this ticket is between Hon R. L. Davidson and Thos Neat.

New Crop, 1916, Crimson Clover seed for sale. Old seed will not germinate properly. Hudson, Hughes & Farnau.

THREE CANDIDATES

For Congress Here Last Monday.

There were three candidates for Congress here last Monday and Stanford had the honor of furnishing two of them. They were Hon. Harvey Helm, Senator Chas. F. Montgomery and Dr. R. L. Davison. None of them let any grass grow under their feet and all seemed pleased with the days work and each felt that he had the nomination nailed down.

Saturday week will tell the tale. Let the best man win.

SCHOOL PER CAPITA \$5.10.

The school per capita in Kentucky this year was fixed Saturday at \$5.10 by Superintendent of Public Instruction Gilbert. This per capita is a reduction of 15 cents per child of school age in the state from last year. The per capita is based on an estimated revenue for school purposes for the state at \$4,761,785. The average for teacher per month will be about \$66.25. The school census for 1916 shows a gain of 2110 children of school age over the census of 1915. According to the census report compiled by the Department of Education there are 743,487 children in Kentucky between the ages of 6 and 20 of which 667,802 are white and 76,585 are negroes. Of this number 112,811 whites are listed in the cities and 604,323 in the rural and graded districts; 23,323 negro children are listed in the cities, and 51,386 in the rural and graded districts.

CHANGES IN SCHOOL LAWS.

A number of important changes were made in the school laws of the State by the last legislature, applicable to Garrard county as well as other counties of Kentucky, which have just become effective. For instance, the annual election of school trustees under the revised school laws, will in the future be held on the first Saturday in October, instead of the first Saturday in August, and the incumbents hold office until next March. Other changes may be summarized as follows: The school census will be taken biennially; under the compulsory school law parents and guardians may be put in jail for failure to pay fines assessed for not sending children to school; the amount of money a county may spend for children is increased from \$100 to \$200; counties may erect joint high schools; graded districts must maintain a high school or pay tuition for their graduates, and the graded district trustees may increase the tax from 50 to 75 cents and the poll tax from \$1.50 to \$2.50; railroad and bridge taxes due special districts are collected by the county school department instead of the sheriff, and students entering the high school at twenty years of age may continue through the course.

TEACHERS INSTITUTE.

Garrard Teachers Meet Week Of July 31.

The Institute for Garrard County teachers will begin next Monday and will continue throughout the week, the sessions being conducted in the Auditorium of the Lancaster Graded Schools. The Institute will be in charge of Miss Jennie Higgins, County Superintendent of Schools, and she has secured Dr. Mc Dougall of the Richmond State Normal School as Instructor. One of the features of the Institute will be an address Wednesday at two thirty by Dr. Gandy Field, President of Central University. He will speak on some phase of educational work and the public is invited to attend this lecture as well as all other sessions of the Institute.

Mrs. Dillingham of Harrodsburg has been secured to direct the musical program of the week.

FARMER MEETING

Held At Court House Monday. Many Farmers Of The County Express Wish

For Farm Demonstrator.

The meeting called for last Monday for the farmers of the county, brought out quite a number of the most progressive farmers to discuss the advantages of getting a farm demonstrator for Garrard county. The meeting was called to order by G. H. Swinebroad and on motion W. R. Cook was made chairman and R. L. Elkin, Secretary. Mr. Swinebroad stated the object of the meeting and gave many good reasons why a farm demonstrator should be had in this county, and the many advantages to be derived from this progressive movement. He cited many counties of the state where they are being employed and spoke of the rapid progress such counties had made under the supervision of a farm agent. Several spoke of the advantages to be gained and of the work such method had accomplished in other parts of the state. Among those who spoke were: F. M. Tindler, E. C. McWhorter, J. E. Robinson and Judge C. A. Arnold.

The expense of employing one of the demonstrators is from \$1200 to \$1800 a year, one half of which is shared by the government and the other half is usually put up by the fiscal court. A committee composed of G. H. Swinebroad, E. C. McWhorter and W. R. Cook, was appointed to wait upon the fiscal court and ask that an appropriation be made from the general fund to aid in securing this agent. This committee to report back at a call meeting of the chairman.

"Garrard county is by far the best producing county in the state and I am heartily in favor of the movement to employ a farm agent," said Mr. E. C. McWhorter, who has seen the effect of such work in the mountain counties of the state.

COURT DAY DRAWS

FAIR CROWD.

Only a medium sized crowd attended Court Day here Monday, and stock sales were slow. Several mules and a few cattle changed hands. Politics was the order of the day and three candidates for Congress were here presenting their claims to the voters. Both State Senator Chas. Montgomery and Representative Harvey Helm, the Democratic candidates feel sure of winning and Robert Davison of Stanford who is a Republican candidate against Chas. Neat of Columbia, says that his name will be on the ballot in November.

THE FARMER

HOLDS THE BAG.

When the Kentucky Rural Credit Association went to the wall, many farmers and other citizens of Kentucky, and among whom are many Garrard county farmers, were swindled out of several hundreds of thousands of dollars. Somebody stole and somebody has been robbed. An investigation by the courts should be had and the guilty parties, be they high or low, should be punished.

It may be proven that it was the slick agents who sold the stock to the farmers or purchased it by men high up in political and business life, or it may be both; at any rate the people have been robbed and the guilty ones should be punished.

WHAT'S THE REASON?

Hatton & West sell overalls at \$1. when others get \$1.35 for the same article?

WHAT'S THE REASON?

Hatton & West sell Palm Beach Suits at \$3.00 when others get \$5.00 for same article?

WHAT'S THE REASON?

Hatton & West sell All Goods so much cheaper than other stores?

BECAUSE'

They pay small rent.

BECAUSE'

They pay no big salaries to clerks.

BECAUSE'

They do all their own work.

BECAUSE'

They sell for Cash and buy for Cash.

BECAUSE'

They lose no bad accounts.

THAT'S THE REASON

Their prices bring home the BACON. GO SEE THEM.

HUNTERS TAKE NOTICE.

This Agreement Witnesseth: That in order to protect the game on our lands for a period of three years we bind ourselves not to hunt thereon, nor permit anybody else to do so, and we further agree to prosecute with diligence all persons who violate the game laws of Kentucky or trespass upon our lands for the purpose of hunting. And we further agree to act as Deputy Game Wardens for the purpose of carrying out this agreement. Except each of us have the right to kill rabbits on our farms or permit it to be done by another under our supervision, or the supervision of some responsible and reliable person selected by us.

KENTUCKY NEWS
CUT TO THE QUICK
FOR BUSY READERS

Winchester has been selected as the place for the opening of the state Democratic campaign on September 1.

George L. Schmid has been re-elected Superintendent of the Kentucky Children's Home Society.

The State Historical Society has moved into the old State House at Frankfort as permanent quarters.

Near Gates, in Rowan County, Henry Eden, 18, shot and killed his father. The boy claims that it was accidental.

Col. J. Embry Allen, of the Second Regiment, was dismissed from the National Guards as physically unfit.

In Louisville \$308,000 has been subscribed toward \$4,000,000 fund to encourage factories.

Armour & Co., of Chicago, has established a distributing plant in Louisville. It is planned to manufacture one million pounds of butter monthly.

Brig. Gen. Roger D. Williams, in command of the Kentucky National Guard, was elected a member of the National Defense League in Washington.

Mrs. E. R. Thomas, formerly Miss Linda Lee, of Louisville, was robbed of an \$18,000 necklace and \$700 in money on the streets of Montreal, Canada.

G. B. Likens, of Hartford, has been appointed as special attorney under the Attorney General of the United States with headquarters in New York City.

The Christian Medical Society adopted resolutions advocating universal military training and urging legislation to this end, "not for preparedness, but for public health."

The executive committee of the Board of Trustees of the University of Kentucky appropriated \$1,000 for the expenses of the golden jubilee of the University to be held at Lexington in October on the occasion of the Kentucky-Vanderbilt football game.

In the Paris police court, Taylor Smith, a 17-year-old colored boy, was fined \$50 and given a sentence of ten days in jail for having in his possession twenty quarts of whiskey which he could not prove was for personal use.

Although the Kentucky Rural Roads Association has received over \$300,000 during the year it has been in existence and \$150,000 of this is admitted to have gone into its treasury, it had only \$500 in cash when it was placed in the hands of a receiver at Lexington.

Fort Thomas was under quarantine for several days owing to a mild case of small pox which developed in one of the members of the Second Regiment from Jackson. He and his company were isolated and every precaution used to prevent any spread, which was readily prevented.

With only forty-five minutes to spare in time to file his campaign expenses, Judge O. J. Kirk, candidate for Judge of the Court of Appeals from the Seventh district, reached Frankfort, used an automobile and chartered a special train at an expense of \$300 rather than violate the law.

Two boys named Jacksons were arrested at Blue Pond, near Hickman, by Jailer C. A. Murdoch on the charge of bootlegging, fined \$50 and sentenced in twenty days in jail. While Sunday school was going on they would come to the window, call men out and sell them whisky, the evidence showed.

Fish in large quantities are reported to be dying in the Brushy Fork creek south of Carlisle. The dead fish are reported to have been found as far as the forks near Miller Station. Some farmers report the water in such a condition as a result of the fish dying that cattle will not drink it.

Mrs. Eliza Hart—"Granny" all the neighbors affectionately call her—celebrated her one hundredth anniversary at her home in Hopkinsville. She carries lightly the burden of her ripe old age, and save for her dimming vision, many a woman a quarter of a century younger would envy her faculties.

Moonsight school will be established in Knox county with the beginning of the next school year next month in an effort to stamp out the last vestige of illiteracy in the county. A gold medal is offered by Gov. James D. Black to the county teacher, instructing the largest number of adults during the year.

A good strike of petroleum in the Artemus neighborhood, near Harroldsville, is creating much excitement and many operators are flocking into the field. The new well is several miles from any pool heretofore developed.

Many thousands of acres have been leased and a number of new wells will be drilled during the next few months.

State Fire Marshal T. H. Pattell has called a state-wide meeting at Frankfort for July 27 to discuss means for the prevention of fire. Delegates have been invited from all municipalities. Fire Marshal Cannell has announced an aggressive policy upon taking office, and has made a number of stringent rulings which will make for cutting down the fire waste.

Hog cholera in three different herds has been discovered in the northwestern part of Bourbon county by Dr. D. C. Hanaway, a representative of the United States Bureau of Animal Industry, who is working in conjunction with the Bourbon County Swine Breeders' Association. All three of the herds have been vaccinated and a thorough disinfection of the farms ordered.

Value of Simplicity.

Simple creatures, whose thoughts are not taken up, like those of educated people, with the care of a great museum of dead phrases, are very quick to see the live facts which are going on about them.—G. W. Holmes.

Don't Worry!

Health is often undermined by worry than by work. Lincoln wisely said that no man ever sank under the burden of the day. It is only when the burden of tomorrow is added, that the load becomes greater than a man can carry. Remember, then, to bear your burden a day at a time and don't worry.

Remarkable Brazeness.

On his crossed bent young Patrick had denied old Patrick's accusation of wrongdoing. Old Patrick was unconvinced. "Don't I know ye?" he said. "Ye look innocent enough, ye young scallywag, but looks is deceivin'. Ye're that brazen that ye could stand there an' lie till ye was black in the face without ever changin' color!"

Third Man Needed.

Brewer was fond of quizzing his friend Johnson. One day, while out walking together, he began his usual practice by remarking: "I say, Johnson, I believe if I had you tied to a pike of string and paraded you round the town, I should make money out of you." "Yes," remarked Johnson, "that you would have to have a man to shout which end of the string the monkey was tied to."

Ukrainians.

The Ukraine, once the first republic in eastern Europe, has been divided between her neighbors. Russia holds its largest part, with some 28,000,000 Ukrainians; the Russian monarchists call that country Little Russia. Austria-Hungary holds a much smaller number, 3,500,000 in eastern Galicia, 400,000 in Ruthenia and 500,000 in south-Carpathian districts of Hungary.

Proper Way to Look on Life.

Take life like a man. Take it as though it was—it is—an earnest, vital, essential affair. Take it just as though you were born to the task of performing a merry part in it, as though the world had waited your coming. Take it as though it were a grand opportunity to achieve, to carry forward great and good schemes, to hold and to cheer a suffering, weary, tired heart to a heartbroken brother.—Charles B. Spurgeon.

Peculiar Wrapping Material.

In Bulgaria, one of the poorer countries, where even cheap German wrapping paper is hardly known, parcels are carefully wrapped up in large square linen or printed cotton, called a lukhka. The lukhka is an institution. The bread is brought wrapped in check cotton; the shoemaker sends your boots home in a gay-colored square; even the wedding presents for a bride are sent in a lukhka. It is returned to the sender (like a basket) by the messenger.

FOR SALE

FARM and Personal Property.

As executor of the will of Rebecca J. West and pursuant to said will probated in June 1915 by the Garrard County Court, I will sell her farm in Garrard County, Kentucky, five miles east of Lancaster, and one mile from the station of the L. & N. R. R. at Hyattsville, on the Kirksville and Hyattsville Turnpike on

Tuesday Aug. 1st, 1916

at two o'clock P. M., on the premises, rain or shine, as the said is made to settle her estate.

TERMS.—There is about 283 acres in said farm; about 130 acres on the east side of the turnpike and about 153 acres on the west side. Said land will be first offered in said two tracts, and then as a whole, and the bid or bids will be accepted, which will realize the most money, said land to be sold by the acre and to be surveyed and so paid for and conveyed subject to said survey.

Bonds with good security to be required of the purchaser, one half the purchase money to be due January 1st, 1917 and the other one half in two bonds or notes of equal amount due and payable in one and two years from January 1st, 1917 and to bear interest at 6 per cent per annum from January 1st, 1917. Possession to be given and deed made when first bond is paid on January 1st, 1917, seeding privileges given in the fall of 1916. A lien to be retained on said land to secure said bonds and notes.

There is on said farm a dwelling house with eight rooms and two porches, stock barn, crib and other outbuildings; also two good tenant houses, three tobacco barns and a pair of scales, splendid water and well watered, and the land is in a high state of cultivation, one half in grass. The farm will be sold first; after which I will also sell five work mules, one brood mare, one mule colt and the farming implements of all kinds. [No household or kitchen furniture to be sold.] All amounts under twenty-five dollars cash. Notes with good security with interest from date due January 1st, 1917 for all amounts over twenty-five dollars.

Marion Johnston, who lives on the farm, will show it to prospective purchasers, and Col. J. M. Dunn will act as auctioneer.

Now Is the Time to Get Married and Save Money. WHO WILL BE THE LUCKY COUPLE?

This fine \$50.00 Cast Iron Reliable Range we will give to any couple who will get married on the grand stand at the fair grounds on the last day of the Danville Fair.

The time of day to be set by the Fair Association.

Make your announcement quickly to the Secretary of the fair association and the names will be kept a secret by him until on the last day of the fair on which day the wedding will take place and the Range awarded. The first couple making their announcement to the Secretary of the fair association of their desire to be married under the terms and conditions of this agreement, shall be given preference over all others who might announce later. If the first couple who announces fails to appear, the next one in order will be called upon. We will assure you that all those who wish to announce that their names shall be kept a secret and will not be give any publicity at all. This is a beautiful range and one that we take great pride in recommending to everyone. So now here's your chance to obtain one free of charge. The Range can be seen in our show window two weeks before the Fair and will be displayed on the grounds during the three days of the Fair.

Democratic Ticket.

For President
WOODROW WILSON,
of New Jersey.
For Vice President
THOMAS R. MARSHALL,
of Indiana.

We are authorized to announce Miss Jennie Higgins a candidate for County School Superintendent of Garrard County, subject to the action of the Democratic primary August 1917.

We are authorized to announce J. O. Bogie, as a candidate for the Democratic nomination for County Court Clerk, primary to be held August 1917.

We are authorized to announce Joe Hamilton as a candidate for County Court Clerk, to fill out the unexpired term of J. W. Hamilton. Subject to the action of the Democratic primary August 1916.

We are authorized to announce Hon. Charles F. Montgomery, of Liberty, Casey county, as a candidate for the Democratic nomination for Congress in this the Eighth district of Kentucky, subject to the primary to be held the first Saturday in August.

We are authorized to announce Jethro Onstott, candidate for the democratic nomination for County Court Clerk, subject to the action of the primary, August 1917.

We are authorized to announce Hon. Harvey Helm, of Lincoln county, as a candidate for the Democratic nomination for Congress in this, the eighth district of Kentucky, subject to the primary to be held August 1916.

Editor Fitzhugh, of the Wilmore Enterprise, hits the nail on the head in the following interesting article which we here reproduce:

"Those who have read the adventures of J. Rufus Wallingford, depicting the ease with which that smooth gentleman separated suckers from their money, to his own use and benefit, will be struck with the similarity between his methods and those of one O. L. Van Lanningham, in hypnotising alleged business men into being dupes—unconsciously, let us hope—in a skin game wherein—under the aegis of their supposed business acumen and eminent respectability—he and his various Blackie Daws, who operated under him, accrued in over two hundred thousand dollars from a too trusting public and then departed with the loot for other fields of endeavor; leaving a bankrupt concern, with an unsavory reputation behind them.

"The history and fate of the Kentucky Rural Credit Association is a striking illustration; not only of the ease with which a fool and his money are parted, under the smooth guidance of an expert; but of the willingness of men to lend their names to give weight to a proposition, impossible of success, but with glittering promises, backed up by large salaries,

"Conceived and organized in Delaware for use in Kentucky, it started out with the seeds of death in its body before it began operations. In the beginning it entered into "an unfair and ruinous contract," so stated by its own officers, whereby Van Lanningham was to sell the stock, to be paid for in four equal installments, of which the first or 25 per cent, was to be his commission. It does not take a very profound intellect to reason that the promoter in the sale of this stock was an expert; but with glittering promises, backed up by large salaries,

"State Senator David Howard Peak, of Bedford, at a meeting of the executive committee of the board of trustees of the University Wednesday afternoon, was elected business agent for that institution at a yearly salary of \$2,500.

The salary is \$500 less than that drawn by Hywel Davies, former business agent. Peak is to perform all the fiscal duties at the university until an auditor is elected. The office of controller at \$1,000 yearly, held by W. T. LaFerty, dean of the law school, was abolished. Enoch Graner, head of the school of journalism, was appointed secretary of the board of trustees.

Peak can, if he desires to do so, continue as State Senator until the expiration of his term, but he can draw only one salary.

"Such a contract would seem sufficient handicap to break down any company which depended on the prompt receipt of its stock subscription to furnish it money which to carry on its business and pay its expenses and was undoubtedly the main rock on which it split. But it was not the only one.

"In addition to the ruinous agreement with Van Lanningham, the company started off blithely without capital, but with a salary list that would stagger any large, established concern with an assured business. The President was allowed five thousand a year, the General Counsel, the Secretary and the Treasurer twenty-four hundred each, which added to various other generous salaries, brought the total operating expenses up to an appalling figure for a struggling infant. So tenaciously did some of these officers hold on to these salaries that, although in the last five months they were cut in two, when it had become apparent that the concern was already moribund, that the treasurer had to be cut off entirely before he could be induced to resign.

"The final blow up under a receivership with over \$350,000 in stock sold for less than \$500 in cash and no assets, is an eloquent tribute to "business acumen" in the management of a concern not two years old, as well as to that of O. L. Van Lanningham. The latter gentleman might well furnish an interesting chapter in "The New Adventures of Wallingford," which have lately shown wear and lack of originality. We cannot, just now, think of a parallel in fiction for "the management."

That Republicans like Republians are ungrateful was never more fully demonstrated than in their shabby treatment of Col. John W. McCulloch, of Owensboro, who was turned down for an untried and comparatively unknown man, whose party service does not compare with his. The position of National Committeeman is purely one of honor with no emoluments and yet it was taken from Col. McCulloch, who could always be depended on to raise and contribute to campaign funds when ever they were most needed, just because the timid heads of the party feared the charge that it was not honest in its anti-labor declaration, if they had a distiller as one of their leaders. Col. McCulloch deserved better at the hands of the party he had served so long and so faithfully and those who think he was slaughtered for expediency are going to resent the treatment accorded him when they mark their ballots in November. There are some scores that won't heal, especially those so unnecessarily made.

The prospects of Democratic victory this fall grows brighter as the days go by and will continue to brighten as the voters more and more realize the fine work of President Wilson in keeping every promise and averting the horrors of war with honor and dignity to the country. Those in New York City who

bet money on the election have shifted from two to one against Wilson to two to one in his favor, and leading politicians of New York say that Wilson is sure to carry Hughes' state by a good majority.

PEAK CHOSEN

Business Agent At University of Kentucky

At \$2,500 A Year.

State Senator David Howard Peak, of Bedford, at a meeting of the executive committee of the board of trustees of the University Wednesday afternoon, was elected business agent for that institution at a yearly salary of \$2,500.

The salary is \$500 less than that drawn by Hywel Davies, former business agent. Peak is to perform all the fiscal duties at the university until an auditor is elected. The office of controller at \$1,000 yearly, held by W. T. LaFerty, dean of the law school, was abolished. Enoch Graner, head of the school of journalism, was appointed secretary of the board of trustees.

Peak can, if he desires to do so, continue as State Senator until the expiration of his term, but he can draw only one salary.

"Such a contract would seem sufficient handicap to break down any company which depended on the prompt receipt of its stock subscription to furnish it money which to carry on its business and pay its expenses and was undoubtedly the main rock on which it split. But it was not the only one.

HERRINGTON

Promoter Denies Rumors Regarding His Dam Proposal.

The Lexington Herald says: L. H. Herrington, of Richmond, president of the Dix River Power Company passed through Lexington yesterday on his way to the site of the proposed dam on Dix River to inspect the diamond drilling being done at the proposed dam site in order to determine openings in the rock formation and to determine whether the foundations for the proposed dam are good. When asked for a statement regarding a recent statement in an afternoon newspaper of the construction of the dam, Mr. Herrington said:

"The newspaper reports were erroneous, unauthorized and very annoying to the gentlemen who are interested in the Dix river dam project. Final steps are not being taken in the matter of building the dam, and we are not hopeful of being able to commence work of this magnitude as long as the foreign hostilities continue. We are perfecting our plans with a hope of being able to proceed when the war breaks. No Eastern capital has been obtained, Richmond and Danville, Ky., parties being the principal ones interested. We are at present doing some diamond drilling at the proposed dam site in order to determine whether there are any openings in the rock formations and whether the foundations for the proposed dam are good."

When Cleaning Windows.

Use strong soda water with plenty of soap for cleaning windows. Rinse freely. Finish off with a succession of warm, dry cloths.

May Prove Big Industry.

Phillip government scientists are studying a shrub which grows profusely in the islands, in the belief that cumphor can be produced from it.

Valuable Submerged Forest.

A submerged oak forest covering several square miles, from which logs more than 100 feet in length have been taken, was discovered by Italian engineers while dredging a river.

Improved Coal Mixer.

Economy of fuel consumption in steamships often requires the mixing of two or more kinds of coal and an Englishman has invented a cooling barge that mixes coal as it delivers it into a bunker.

United States' Kindergarten.

The word kindergarten, German for children's garden, means a school conducted on the theory that the earliest education of young children should be based on object lessons, exercises with tops, games and other activities calculated to interest them. This method was introduced by pioneer educators at New Harmony, Posey county, Indiana, in 1820. For some years this was the only kindergarten school in the United States.

Find Fee of the Locust.

Recently by the Argentine department of agriculture has shown that a natural parasite enemy of the locust exists, and the department has recommended that the National Instituto de Entomología and the section of applied zoology of the live stock bureau co-operate in a study and application of the best means to propagate this parasite as the most effective way of checking the ravages of locusts. The sum of 800,000 paper pesos (\$212,900) has been appropriated for use in the campaign against locusts.

JAMES WHITCOMB

RILEY DIES.
Beloved Hoosier Poet Passes Away At Indianapolis.

James Whitcomb Riley passed away at Indianapolis Saturday night at ten thirty. The cause of his death was paralysis, from which he suffered a violent stroke Saturday morning.

The poet was the son of Reuben A. Riley, a lawyer and political speaker of Greenfield, Ind. The younger Riley could not be brought to the dull routine of school days, but he was wise in the lore of streams and fields. His mother, who was Elizabeth Narine, before her marriage, was a writer of verse.

Instead of preparing for the practice of law, as his father wished, the son apparently prepared for nothing, and when he left home, he turned itinerant sign-painter to make his living. What he carried from the little schoolhouse was some sympathetic knowledge of literature imparted by his teacher, Lee O. Harris, himself a poet.

For ten years, Riley roved the Ohio Valley, painting commercial signs on fences and farm outhouses. He had the trick of brush and pencil, and cleverly drew sketches illustrative of the virtues of merchandise advertised in the signs he and his fellow artisans made to bloom on the roadsides. He was naturally musical, and sang as a fiddler in the villages at which his party stopped at night. He played for dances and at concerts in country hotels, and he wrote rhymes which sometimes found their way into the country newspapers.

He led this cheerful, free and easy life until late in the '70s, when he took employment as a writer for a newspaper at Anderson, Ind. He had now begun to write verse steadily, but with little encouragement from publishers.

In the early '80s, Mr. Riley settled in Indianapolis, and began writing verses in "Hoosier" dialect for the Indianapolis Journal, for a small salary. He sent some of his poems to Henry Ward Beecher Longfellow, and they received his praise. A volume was published, and "The Hoosier Poet" began to win a public.

He was a graphic reader of his own verses, and for fifteen years, or until 1880, he made tours of the country, appearing in public entertainments with great success, both alone, and in association with the humorist, Bill Nye, who was his intimate friend.

Publication of books of poems year after year brought Mr. Riley wealth and wide recognition of his literary genius. Many of his poems are of imaginative fantasy or are gently philosophical. In 1902, he received the degree of Master of Arts from Yale University, and in 1914, the University of Pennsylvania conferred upon him the degree of Doctor of Letters.

In July, 1911, the poet presented to the city of Indianapolis property valued at \$75,000 for a site for a public library and school administration building.

Mr. Riley never married but he was a lover of children, whose spirit he divined intuitively, and of family life.

At the request of the Governor of Indiana, the relatives of the poet allowed the body to lie in state at the Indiana capital Monday night and thousands paid by to pay their last respects to the illustrious dead. Funeral services were held at the poet's home Tuesday morning and were private according to the wishes of the poet. Afterwards, the burial took place in Crown Hill Cemetery, Indianapolis. Thousands of telegrams were received by the family, among them one from Vice President Marshall, a personal friend of Mr. Riley. It read;

"To die for one's country is to rend the heights of glory; to live for humanity so that each succeeding age will be happier is to attain immortality. This is the record of James Whitcomb Riley. Rest to his ashes and peace to his soul."

For Sale.

Household and kitchen furniture. Mrs. John Mount.

"I CAN NOW EAT ANYTHING; AM FREE FROM STOMACH ILLS", SAYS MRS. COLLINS OF MCVEIGH, KY.

"I am sure the reason I feel so well today is because I took Tanlac and I want to give it a good recommendation," said Mrs. Lydia Collins of McVeigh, Ky.

Tanlac is a wonderful reconstructive tonic and produces the most gratifying results.

It is because Tanlac does the work and does it quick that its leap to higher success has been marvelous. That Tanlac surpasses all medicines as a reconstructive tonic has been proven in these columns by the leading men and women of the commonwealth of Kentucky.

Tanlac is being introduced in Lancaster at R. E. McRoberts.

Tanlac may be obtained in the nearby cities. Paint Lick, J. N. Metcalf, Dryantsville, Becker & Ballard, Little Hickman, Collier and Brumley; Berea, S. E. Welsh, Stanford, Penny's Drug Store, Junction City, Reynolds and Evans, Richmond, H. L. Perry & Son, Crabb Orchard, Wayne Bros.; Burgo, G. T. Schowfeld, Dauphin, John S. Wells, R. E. McRoberts, Lancaster, and W. C. West, Silver Creek.

FARM FOR SALE.

The Deering Mowing Machines possess all the good features of a good mower with many improvements, most of which are exclusive with the Deering which you will like and should have on your new machine.

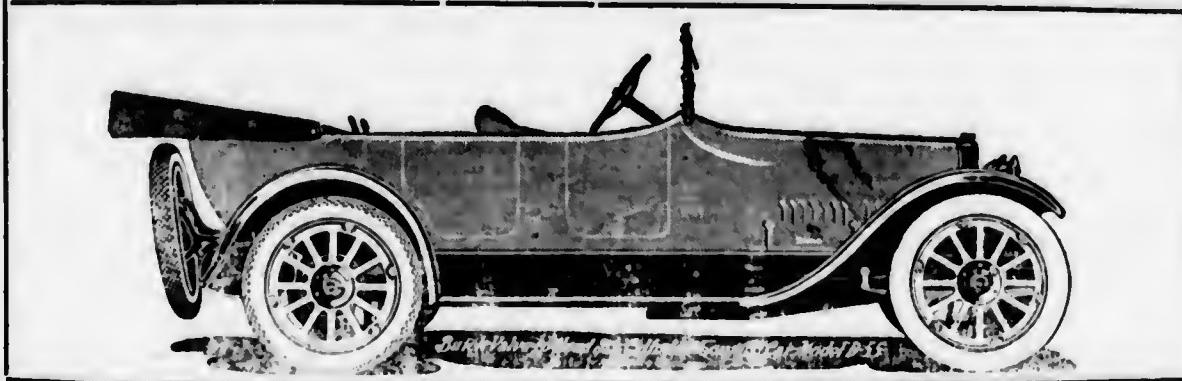

Among the chief of the features are, long enduring qualities, light draft, effective raising lever, flexible gang arrangement, no danger of cutter bar bending, buckling or knife breaking. A clean shear cut the full length of the mower bar, removable wearing plates, external main gear, rigid main frame, coupling bar has a number of distinct features possessed by no other mower. Easy to replace parts, spring tucker board. Pole is strengthened. Easy on horses and operator.

Come in and let us show this splendid mower or send for attractive illustrated booklet giving full descriptions of the full line of Deering Machines.

Mrs. Clarence H. Vaughn was host at a beautiful reception at her home in West Main Street, (Richmond) in compliment to her guest, Mrs. R. B. Spindale, Jr., of Norfolk, Va.; in the receiving line were, Mrs. Vaughn, Mrs. Spindale, Mrs. Harvey Chemault, and Mrs. J. G. Crabb. Those who assisted in entertaining were: Mrs. J. R. Johnson, Misses Duncan Foster, Cynthia Davidson, Henrietta Luxon, Nancy Hayden and Mary Ross. Climax

CARD OF THANKS.

We wish to express our appreciation to all that assisted and expressed their sympathy over the loss of our daughter Nancy.

Mr. and Mrs. Lee Palmer.

Man and the Job.
The size of a job is the size of the man who holds it.

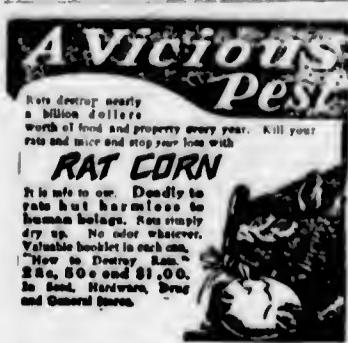

Where Trade Does Not Stop.
This might be used as the basis for a maxim: "Trade goes past the door of the man who does not stop it."

In Praise of Life on Farm.
If every child were in a home and every home in a garden, most of the social ill would disappear. Moral: Be glad you live on a farm.

Cure for Restlessness.
Medical men now cure restlessness, apprehension and "nerves" by prescribing baths, exercise and the correction of bad habits. They relieve anxiety and morbid fears and correct nervous irregularities of the heart and circulation by a course of deep breathing.

Have to Be Careful.
"Has woman a sense of humor?" asked the master of fact man. "Oh, yes," replied Miss Cayenne. "But she has to curb it. If women laughed at everything they saw that's funny they would spoil efforts to propose by some really nice men."

Pointing Out a Difference.
Dean Hole, who was the pioneer of rose shows in his country, was fond of telling this story: "At Cambridge, England, a horticultural show was suddenly invaded by a heavenly host of sweet girl graduates. 'Madam,' said a member of the executive to the lady in whose charge they came, 'may I point out that this is a school for horticulture and not for hortadury?'

R. E. McRoberts, Druggist, Lancaster

KENTUCKY FAIR DATES.

The following are the dates fixed for holding the Kentucky fairs for 1916 as far as reported.

Taylorville, August 1-4 days.

A Neatly Engraved Visiting Card

Is THE proper thing for a lady or gentleman to present nowadays, when making calls.

Come and see what a beautiful line of samples we have and get our prices for 50 or more.

CENTRAL RECORD

STORY OF A BRICKLAYER

By LOUISE B. CUMMINGS

John Bounce was a mason. That was before there were labor unions, and John did not get very good pay for his work and not much work, either. His wife was delicate, and there was a plentiful crop of children.

One day while John was laying brick a man stopped beside him and said:

"My good man, would you like a little work to be done in the evening when you have nothing else to do?"

"I would if I got well paid for it," said John.

"Where do you live?"

John gave his home address, and when it was dark the man appeared.

He told John that he must be blindfolded.

John didn't like this, but the man laid a five dollar bill on the table and said that when the work was done he would give him double the amount.

Seeing that there was nothing in the house to eat, John permitted the man to tie a handkerchief about his eyes, and, taking the other's arm, he was led forth on to the street, which at that hour was well nigh deserted.

While the visitor was in the house John Bounce's wife was in the adjoining room, where the children were asleep. When she saw her husband go blindfolded with the visitor, either fearing for John's safety or through curiosity, she followed the two. They went into the business part of the city and stopped before a building bearing a sign, "Hirshimer & Co.". John's conductor opened a door, guided John through it and shut the door behind them.

The Blue Grass Fair association, incorporated, of Lexington, Ky., announces the following speed program, Aug. 7 to 12, 1916:

TWO - YEAR - OLD TROTTERS

CLASS (2 IN 3) \$600

Three-Year-Old Trotting.....\$600

2 1/2 Trotting.....\$500

2 1/2 Fading.....\$500

2 1/2 Pacing.....\$500

The track is a mile in length.

The rules of the American Trotting Association to govern.

Two or more horses under the same ownership or control or trained in the same stable may enter and start in race upon payment of entry fees.

A horse distanching the field or any pair thereof will only be entitled to first money.

The right is reserved to postpone any race for any cause, to change the order of racing or declare off on account of bad weather or bad track. Also to declare off any race if it does not fill satisfactorily and return entrance fees to owners.

Money divided 50, 25, 15 and 10 per cent.

Records made in Kentucky fair circuit no bar.

Other races by members of the Lexington Driving club.

The running races, of which there will be three or four each day, will be under the supervision of James P. Ross, which assures an attractive program.

Part-mutuel betting on all races.

WOMAN'S DEPARTMENT.

The Woman's Department of the Blue Grass Fair, to be held at Lexington Aug. 7 to 12, will be more important and extensive this year than ever before. The premium list has been revised, and classes offered cover almost every kind of woman's work and taste luxuries. The third floor of the Art hall is given entirely to this department and is usually one of the most attractive exhibits of the Big Fair. Entries limited to Kentucky only.

Half Fare Rates to Fair.

Do not fail to visit the Blue Grass Fair at Lexington the week of Aug. 7 to 12. One fare rates will prevail on all railroads in Kentucky. Every afternoon and evening, beginning Sunday, Aug. 6, there will be magnificent band concerts, with high class vocalists in a grand concert.

Swine and Sheep at the Blue Grass Fair

A full quota and classification for swine and sheep has been arranged for the week of Aug. 7-12 at the Blue Grass Fair.

The management was compelled to eliminate these classes last year on account of the foot and mouth disease then prevalent, but are pleased to reinstate them with a very attractive premium list.

Half Fare Rates to Fair.

Do not fail to visit the Blue Grass Fair at Lexington the week of Aug. 7 to 12. One fare rates will prevail on all railroads in Kentucky. Every afternoon and evening, beginning Sunday, Aug. 6, there will be magnificent band concerts, with high class vocalists in a grand concert.

SADDLE HORSES AT THE BLUE GRASS FAIR, LEXINGTON, KY., AUG. 7-12

SADDLE horses will be an important feature at Lexington this year. The Blue Grass Fair, to be held Aug. 7 to 12, will offer stakes and purses for all ages and classes of saddle horses; also for roadsters, fine harness horses, Shetland ponies and a full quota and classification for the three great breeding classes—standard breed, thoroughbred and saddle horses.

We are equipped to do any and all kinds of

JOB WORK.

WEBER MILITARY PRIZE BAND WILL BE HEARD AT BLUE GRASS FAIR

This Famous Musical Organization Has Twice Won Prizes In National Contests Against the Best Bands of America.

JOHN C. WEBER, DIRECTOR OF THE PRIZE BAND OF AMERICA, WHICH WILL BE AT THE BLUE GRASS FAIR, AUG. 7 TO 12.

defend the honor at any time and place It is a bargain offering, indeed, of music played, sung and rendered in various forms or individual and collective styles by artists under the direction of the distinguished John C. Weber.

A great treat is in store for the musical-loving public of the Blue Grass region.

STATE UNIVERSITY EXHIBIT AT BLUE GRASS FAIR

Farm, Orchard and Garden Products at Floral Hall.

At the Blue Grass Fair, Aug. 7-12, the College of Agriculture of the State University will make an educational exhibit in the Floral Hall of farm, orchard and garden products and also many other material representations each intended to teach its lesson.

The exhibits include illustrative material from the department of Agriculture (tools and crops), Horticulture, Animal Husbandry, Food and Drugs, Entomology, Veterinary Science, Dairying, Poultry, Home Economics, etc.

These exhibits are intended to teach by material representation the facts learned by experiments conducted at the Kentucky Experiment Station or stations in other states.

The purpose of the whole exhibit is to instruct rather than merely to amuse or entertain the visitor. It is an easy matter to arrange beautiful features of grain in the sheaf and of other beautiful things that may have been selected from the farm, but such an exhibit does not give the spectator a beneficial idea that will help him when he returns to his farm. It is to fill this need for help that the exhibit of the Agricultural College is prepared.

Again, the work of conducting this exhibit is an effort on the part of the college to get into close personal contact with the farming public with the idea of mutual helpfulness. Representatives of the college will be in constant attendance for the purpose of consulting. Bulletin on various farm topics will be distributed free of charge.

Increased Premiums at Blue Grass Fair.
The premium list of the Blue Grass Fair has been revised this year, and there is a very noticeable increase in nearly all classes for live stock. Cattle, swine and sheep have been re-instituted, and the public will be assured of a big display in these classes. Outstanding among the features of live stock exhibit will be the Hereford Cattle Show, for which the Association is offering \$1,000.00 in premiums.

The management has assurances of one of the greatest displays in the class that has ever been seen at any fair.

Suckling Mule Stake.
Another feature in the stake is milieus, foals of 1916, either sex for which the Association is offering a premium of \$150.00. This will bring out one of the largest rings in the history of fairs. Liberal provision has also been made for other classes in milieus as well as Jacks and Jeannies. Altogether the premium list for 1916 is the most attractive ever offered at the Blue Grass Fair, and copy of same will be mailed upon application to John W. Bain, Secretary, Lexington, Ky.

Mr. and Mrs. E. B. Temperton, in the Knickerbocker Press.

If you doubt that the chickens notice the difference try this
out for yourself. Remove the water from the fountain where it has been standing
for several hours and has become warm and place thereon some fresh cold water and note how the chickens will immediately crowd about the fountain for a drink. They need this as much as we do, and where they are deprived of it they suffer, and where you make conditions of this nature you will find that the chickens will not do as well.

They will prefer to drink from any pool where water has settled after a rain, no matter how insanitary a place it is, than to drink the tepid water from dirty fountains.

These fountains should be cleaned with boiling water every few days to take away the impurities. Nothing is so quickly tainted as drinking water, and where the fountains are never cleaned it is no wonder that there is sickness among the chickens. If you will take the fountains that are to be used for young and growing chicks and send them you will at least be assured that there will be no mortality because of any disease that may be lurking in the old fountains.

Keep the water fountains in the shade. Change the water frequently and you will find that the chickens will prefer the fountains to the pools in the yard where the sanitary conditions are certainly not the best.

Worthless Gift.

HAMMACK

Mrs E. G. Hammack has been very sick, but is better.

Miss Nellie Beazley is the guest of Mrs Lytle Hammack.

Miss Rena Poynter is visiting relatives at Crab Orchard this week.

Mr and Mrs Jim Botner were guests of Mr and Mrs Jim Collier, Sunday.

Mr Webster Faulkner and wife attended preaching at Beech Grove Sunday.

Misses Ida, Mamie and Goldie McQuerry were the guests of Miss Hallie McQuerry, Sunday.

Mr Arthur Green of Villa Grove Ill. is visiting her mother, Mrs Samson Archer at this place.

Mrs Willie Hall of Lancaster has been visiting her parents, Mr and Mrs Arthur Hall the past week.

We will buy your wheat, store it, or exchange it for First Patent Flour.

Hudson, Hughes and Farnau.

Miss Ollie Ball has returned home after spending a few days with her friend, Miss Ray Beazley.

Protracted meeting will begin at Good Hope the first Tuesday night in August. We are expecting a good revival as Rev. Dotson of Harrodsburg will conduct the services.

CARTERSVILLE

Little Hattie B. Davis who has been very sick is better at this writing.

Mr. and Mrs. Jeff Davis entertained a number of their friends last Sunday.

Miss Myrtle Carter left last Sunday for a short visit with friends in Indiana.

Miss Eva Merriman was the guest of Mrs. Mary Clark Saturday and Sunday.

Mrs. J. G. Davis was the guest of her aunt, Mrs. S. M. Davis last Sunday night.

Mr. and Mrs. D. L. Gabbard are visiting friends and relatives in Clay county this week.

Mrs. Addie Davis and Mrs. Kate Metcalf were the guests of Mrs. Annie Sternes last Sunday.

Miss Lola Turner left last Saturday for Livingston where she expects to stay for some time.

Mrs. S. M. Davis and Miss Susie Davis were the guests of Mr. and Mrs. John Davis last Tuesday.

Miss Martha Carter and Miss Susie Davis were the guests of Mrs. Susie Kenfro last Saturday night.

Mr. and Mrs. Bluffard Jennings were the guests of her parents, Mr. and Mrs. J. T. Allen last Friday night.

The Rev. F. P. Bryant filled his regular appointment at White Lick Baptist church Saturday and Sunday.

Our flour is not adulterated. It is guaranteed to please you. The price is right. Hudson, Hughes and Farnau.

Miss Ollie Ball has returned home after spending a few days with her friend, Miss Ray Beazley.

Mr. and Mrs. Pierce Allen and Mr. and Mrs. Charley Crutcher were the guests of Mrs. Eliza Conn last Sunday.

Miss Cora Rook and Miss Katie Holtzclaw were the guests of Miss Effie Dawson of Kirksville last Saturday and Sunday.

Percheron horses are popular in the United States for several reasons.

They are ever in their mettle, yet not nervous or fretful.

They are free workers and seldom lose their heads. A headstrong Percheron is rare. The animal shown is a yearling Percheron stallion.

caution possible must be taken guard against injury, because it means the saving of money.

Fences, too, must be guarded against by having the posts clean and by having minimum posts and all breeding ground for trees cleaned up.

From the hot sun in summer is another factor that increases the growth and thrift of the colt and increases the profit to the owner. It pays well to handle the colts the first summer. They should be broken to halter. Their feed should be picked up and, whenever they need it, trimmed. If they are handled the first summer much of the work of breaking later will not be necessary.

Good care and management the first summer will ensure the colt to become a bigger and better horse and a more profitable farm product.

AROUND THE DAIRY.

If the heifers kick some when you begin to handle their little udders never strike them. Speak quietly and be patient. If you have never used a Babcock tester start in now and know just where you are with your herd. Success in dairying does not depend upon the number of cows a man keeps, but the way in which he keeps them. Make plans for building a silo if you expect to keep ten or more cows. The dairyman should never forget the alphabet—the three C's, care, comfort and cleanliness.

FEEDING GRAIN TO COWS ON PASTURE

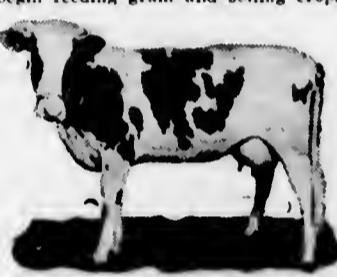

There are some questions that cannot be answered by "yes" or "no." And so it is regarding the question as to whether it is profitable to feed grain to cows that are on pasture.

There are some things, however, that are very certain and not open to argument, says Kimball's Dairymaster. It will pay and may well to feed grain to good cows when they are on poor pasture, and it will not pay to feed poor cows at any time.

There comes a time each year when pastures are at their very best, when cows other than the most highly productive ones refuse silage and grain. They are then receiving feed in abundance and a properly balanced ration, as is evidenced by the overflowing pails of milk they give night and morning. They need no grain, and it is well for a time to withhold it, giving the powers of digestion a rest.

Unfortunately the favorable season lasts but a couple of months. Then grass gets short and the cow begins to decline in milk flow and get poor in flesh. She is still on pasture, but conditions are vastly different. If at any time of the year she needs grain she needs it now. She says so herself, but it is only the thinking man who understands that the decrease in milk flow and flesh are but the signals calling for assistance.

Just as soon as the milk flow begins to decrease it will prove profitable to begin feeding grain and silaging crops

Admirers of the Holstein breed of dairy cattle contend that this breed is capable of doing a greater volume of business than is milk produced at extra expense than other dairy breeds. The Holstein cow is kind, docile and has great capacity for converting roughage into dairy products. The cow here pictured is a pure bred Holstein.

or silage. Only a small amount is required at first, but as the drought comes on and the grass dries down the grain and succulent food should be gradually increased at a rate that the cows will continue to produce with that persistency which insures a profitable year's work.

All experience and experiments have shown that cows will give more milk and keep in better condition if fed grain when on pasture. Some experiments show that there is no immediate profit from feeding grain, the cow merely paying for the feed at good market prices, but only the short sighted man would fail to see because of this, for it is the after effects that give the profit.

The one who looks ahead realizes that winter will come before his cows freshen again and if they have been allowed to decrease in milk flow during the summer, when milk is cheap, they cannot be induced to give a large yield when milk is high. In fact, there is but one conclusion to draw and one answer to the question as to whether it pays to feed cows grain on pasture or at any other time. If in order to keep cows milking persistently and at their best it is necessary to feed grain, then it is advisable and profitable to do so. Provided good cows are kept under comfortable conditions, for none other than large, persistent milk and butter fat production pays.

Treatment For Calf Scours.

Give castor oil in milk to clear the tritum from the digestive tract, then mix in each pint of milk fed daily a teaspoonful of a mixture of half an ounce of formaldehyde in fifteen and a half ounces of freshly boiled water. Triple sulphocarbolates, to be bought at the drug store, would also be likely to help in such a case of scours, due to bacterial action in the intestines—Hoard's Dairymaster.

Holstein Holding Up Milk.

Kindness is about the only thing that can be followed in preventing a heifer from withholding her milk, as it is commonly called. Withholding of milk is not a voluntary action on the part of a cow, but an involuntary action, and for that reason kindness must be followed in order to put the heifer in an attitude so she will not withhold her milk.

Start of Coffee Industry in Java.

Down to 1600 the only source of coffee supply was Arabia; but in that year Governor Van Hoorn of the Dutch East India company received some coffee seeds from traders, who plied between the Arabian gulf and Java. These seeds were planted and thrived so well that the industry of coffee-growing soon made Java one of the richest possessions under the control of the historic Dutch East India company.

THE POULTRY YARD.

Feed laying hens for flavor of eggs. Clover, bran, wheat, alfalfa, oats—all these are useful in forming a rich, delicate flavored egg. Blackhead in turkeys is an infectious disease of the liver and the intestines. No cure for it has yet been found.

The best way to have eggs keep fresh during the hot weather is to have infertile eggs.

The molting hens do not require a ration very different from hens on a range. Sunflower seeds in their season are good.

The best way to get rid of fleas on poultry is to dust each bird separately with a good flea killing powder.

WATCH FOR RED MITES IN CHICKEN COOPS

All through the hot weather watch out for the red mites. The beginner in poultry is apt to be innocent of the danger from this blood sucking pest, writes J. L. Woodbury in the Farm and Fireside. Salting forth at night from hidden recesses, the mites gorge themselves upon the defenseless chicks. At daylight they return to their hiding places, leaving no trace to betray their visit.

The hidden parts of a coop may be literally alive with mites, and what is considered a most thorough inspection may fail to locate them.

The beginner notices that his chicks come out of the brooder or coop in the morning listless and weak, and even though the weather may be warm they huddle together as if cold and tired, and die without apparent cause. This makes all sorts of changes in feed, ventilation, etc., which, of course, are all ineffectual as long as the chicks are exposed nightly to the attacks of the mites.

The extent to which mites can keep hidden was revealed in me quite by accident. A flock of my chicks had been acting as above described. It was

Unit about twenty-five years ago the Guernsey breed of dairy cattle was not so well known or popular as some of the other breeds. During the last few years, however, the Guernsey has come to the front through sheer merit and today stands in the front rank of milk and butter producers. The cow shown is a pure bred Guernsey.

self protection she will be compelled to hunt the pots of water or the shade of trees and use her energy fighting flies and keeping as cool and comfortable as she can. Under these conditions it is impossible for her to produce milk either largely or profitably no matter how well she may be fed. Rapidly she will decline in milk flow, rapidly to return to the same high plane of productivity until she freshens again. Millions of dollars is the toll thus exacted by the flies, bugs and excessive heat from the men who milk cows, but do not protect them against these ravages.

To prevent this loss is not a difficult task, and each year finds more dairymen following the course of wisdom. On farms where the campaign of swatting the fly is practiced the number of these pests is becoming greatly lessened. There are sprays that will keep those that remain away from the animals, and he who has his stable properly ventilated for winter use can easily darken it and provide quarters that will protect his cows from the blazing rays of the midday sun.

Here they can eat green feed or silage, make milk and rest comfortably preparatory to grazing the pastures at night, when the sun is on the other side of the world and the insects are asleep. This will incur some extra work and perhaps a little expense, but the question as to whether or not it will pay well has been conclusively answered in the affirmative by Dame Nature every year since the cow was converted into an artificial being with the ability to provide large volumes of food for mankind.

DYING OFF MILKERS.

Larga Producing Cows Must Be Handled With Care to Prevent Injury.

The customary method of drying off the average dairy cow is simply to omit every other milking until the milk flow diminishes and then skip still more milkings till it stops entirely, says the Farm and Fireside. Sometimes the process will require two or three weeks, but usually less. A cow producing less than ten pounds of milk daily may be dried off any time without injurious results simply by stopping milking.

High producing cows are more difficult to handle in this respect, and some dairymen claim it is impossible to get their best cows to go dry. The first step to dry off an animal producing twenty pounds of milk a day or more is to change the feed. If she is on pasture remove her to a dry feed lot. If she has been receiving alfalfa or clover hay give her timothy or similar non-arucous feed. In winter time take away the grain.

Then milk at irregular intervals, and the flow will soon decrease. At the end of a week it will fall off about five pounds, and in a few more days milk may be stopped entirely. The udder may fill up, but in a few days the milk will be reabsorbed, and finally the udder will become normal. A rest of about six weeks is beneficial to the cow, and experience has shown that cows will have a greater annual yield if they are dried off instead of being milked up to the time of calving.

Black Nosad Guernseys.

The black nose of a Guernsey does not indicate impure breeding. There are many splendid pure bred Guernseys with black noses. A few of the Guernsey breeders make considerable objection to Guernseys having black noses. It is rather a foolish fear that Guernsey breeders must contend with. There was a time when it was held that the Jersey must have a black tongue and a black switch, but this has passed, and we hope that the black nose will receive less attention in the future than it has in some instances in the past—Hoard's Dairymaster.

Charcoal For Poutry.

A supply of finely ground charcoal is good health insurance for poultry. A handful of charcoal to each gallon of mash will prevent many a bad case of indigestion, which is the forerunner of the various liver troubles that afflict the fowl in the past—Hoard's Dairymaster.

COMFORT FOR THE COW.

Wise Dairymen Will Protect Her From the Sun and Insect Pests.

A great essential necessity for large milk production is that the cow be comfortable. Needless indeed is the one who has been unmindful of the persistent manner in which cows have worked day and night, who has profited from the full pails of milk and yet has not realized that the mild temperature, the bright but not hot sunshine, the abundance of fresh air and the freedom from flies and insects have all contributed to the comfort of the cows and made it easy, even tempting, for them to work hardest.

Now the sun is hot and flies come in swarms, says Kimball's Dairy Farmer. There will be no comfort, no peace, for the cow from morning until night. The best way to have eggs keep fresh during the hot weather is to have infertile eggs.

The molting hens do not require a ration very different from hens on a range. Sunflower seeds in their season are good.

The best way to get rid of fleas on poultry is to dust each bird separately with a good flea killing powder.

Making the Little Farm Pay

By G. C. BOWSFIELD

Potatoes continue to be one of the best of the money crops. This product is suited to farms of all sizes and is almost unsurpassed for profitability among ordinary field crops.

For some years there have been predictions that potatoes would not long remain a paying market crop, owing to probable overproduction. Nevertheless prices have averaged high, and production goes on. Michigan, Wisconsin, Pennsylvania, Maine and New York have potato crops upward of \$10,000,000. The latter, in fact, has reached \$20,000,000. Several other states are above \$5,000,000.

In thousands of cases the potato crop has paid farmers at the rate of \$100 an acre or more. This can be expected under favorable conditions, but not otherwise. An average of \$50 an acre would be fair, and while the aim should be for the \$100 mark, a return of \$50 is better than any grain crop will do.

In thousands of cases the potato crop has paid farmers at the rate of \$100 an acre or more. This can be expected under favorable conditions, but not otherwise. An average of \$50 an acre would be fair, and while the aim should be for the \$100 mark, a return of \$50 is better than any grain crop will do.

POTATOES ARE A GOOD MONEY CROP.

Soil that is sweet, well drained, full of organic matter and free from parasitic life will give bumper yields of potatoes under systematic cultivation. When a farmer has such land he should do his best to bring on paying crops. Soggy or impoverished land is not to be used for potatoes.

One great advantage in raising potatoes is that they have high feeding value for live stock and poultry, so that the crop is not a loss no matter how low the market is. When a farmer has a heavy supply of potatoes he is able to sell off his grain more closely than he otherwise could. Potatoes boiled and mixed with milk are an excellent ration for cattle, hogs and fowls. Cured potatoes should generally be used in this way. Both early and late varieties have special merits and work nicely in double crop schemes. A grower instead of experimenting with every variety that he hears of should get one or two kinds that are known to be good and stick to them.

The necessity for disinfecting seed potatoes is evident. All seed from unknown sources should be disinfected, as well as all concerning which there is the slightest doubt. One method of disinfecting is to soak the potatoes in a formaldehyde solution, a pint to thirty gallons of water. This is the best method for ordinary potato pests. If there is a large quantity to be disinfected a good way is to place them in an air tight room, laying the potatoes in trays or boards so that the air can get between them. Then for each 1,000 cubic feet of space use twenty-three ounces of potassium permanganate and three pints of formalin. Place the permanganate in a thin layer in the bottom of a pall three feet or more from the potatoes. Pour the formalin into the pall and let stand for twenty-four hours or longer.

If disease or insects are known to be in the soil it is best to spray regularly. Bordeaux is the most effective remedy for parasitic diseases. Of chief importance is early spraying. The mixture for both insects and fungi is made as follows: Copper sulphate, five pounds; lime, five pounds; water, fifty gallons; paris green, one pound, or lead arsenite, three pounds. Those who have a large acreage can afford to keep a stock of this material on hand, using separate vessels for the lime and the copper sulphite.

Rotation of crops must be practiced in order to keep the soil clean. If fresh manure is to be used it should be applied the fall before, but well rotted manure may be applied in the spring. Lime should not be applied directly before plowing. Experiments indicate that sulphur of potash produces a better quality of topsoil. Potatoes, which have a greater value per acre than other crops, will respond profitably to heavier applications of fertilizers. A fertilizer known as the 4-8 mixture is recommended as a good formula for potatoes. These prepared fertilizers will pay when used at the rate of 1,500 pounds per acre, one-half at the time of plowing in rows and the remainder over the rows about the time the plants are coming up.

No farmer should depend on potatoes as an exclusive crop, but success will come by making them part of the mixed farming plan. The soil must be right and the seed reliable to get good results. With a little care on these points potatoes are likely to exceed the expectations of those who cultivate them.

Change the water several times a day during the hot days of summer. The birds will appreciate it and will come along much better than though they were neglected in this particular. It is simply astonishing to note how much water a lot of young chicks will get away with. They are inveterate drinkers and they are permitted to eat what they will of it. This is kept before them from the very start. The oatmeal is mixed in with the dry mash later or when they are about two months old. The best scrap is fed sparingly at first and increased as the chicks grow. It is well to say right here that it will pay any one to purchase the very best grade of beef scrap that they can acquire—the best is none too good.

One thing that is often neglected is the providing of shade for the growing chicks. This should be arranged for regardless of what other work may demand your attention. The hot summer sun will soon spoil the plumage of your growing birds and take the luster from the feathers.

Change the water several times a day during the hot days of summer. The birds will appreciate it and will come along much better than though they were neglected in this particular. It is simply astonishing to note how much water a lot of young chicks will get away with. They are inveterate drinkers and they are permitted to eat what they will of it. This is kept before them from the very start. The oatmeal is mixed in with the dry mash later or when they are about two months old. The best scrap is fed sparingly at first and increased as the chicks grow. It is well to say right here that it will pay any one to purchase the very best grade of beef scrap that they can acquire—the best is none too good.

Furthermore the growing stock should be well graded. Do not let chicks of all ages and sizes grow up together. The larger ones will crow the smaller and the result will be that they will not do nearly as well as though they were by themselves.

No. 6. 310 acres on pike, 4 miles from Lancaster, good land, slightly rolling, well improved, at \$90.00 per acre.

No. 7. 171 acres, 4½ miles on main pike, fine land and well located, good improvements, at \$100.00 per acre.

No. 8. 121 acres on good road, 1 mile from pike, rich land, partly rolling, brick house and tobacco barn, \$85.00 per acre.

No. 9. 125 acres, 1½ miles from railroad, good road, 1 mile from town, land very fertile, tenant house and two large tobacco barns, \$120.00 per acre.

No. 10. 600 acres, 1½ miles from pike, well improved, residence, stock barn and tobacco barn, well watered, mostly in grass, hemp and tobacco, land ready for cultivation. A money maker at \$65.00 per acre.

No. 11. 150 acres on pike, good land well improved, good neighborhood, 3 miles from small town. Price \$90.00 per acre.

No. 12. 56 acres of fine land, 1 mile from Lancaster, small residence, large tobacco barn and other improvements, \$125.00 per acre.

No. 13. 97 acres 1 mile from Lancaster, on pike, fine land and new improvements, \$125.00 per acre.

No. 14. 201 acres unimproved, fronting on two pikes, 1 mile from Lancaster, first class land in every particular, a number of fine building sites, susceptible of division into several smaller farms. Price \$180.00 per acre.

No. 15. 243 acres, 4 miles out on pike, highly improved, mostly in grass, good land, ready for business, \$75.00 per acre.

No. 16. 225 acres in State of Indiana 45 miles north of Louisville on R. & R. R., fertile land and good improvements, will sell or exchange for other property.

No. 17. 125 acres, eight at town, old time brick residence, large rooms, brick our buildings, attractive home, good land, susceptible of making a suburban division, a number of fine building lots, fronting on street, but we must sell as a whole, has never been on the market until now. Further particulars and price on application.

No. 18. 200 acres, on pike, 4 miles from Lancaster, very high class improvements, large handsome residence, large barns, etc. Can be divided into two or three or more farms, but we must sell as a whole at \$150.00 per acre.

No. 19. 200 acres, on pike, 4 miles from Lancaster, very high class improvements, large handsome residence, large barns, etc. Can be divided into two or three or more farms, but we must sell as a whole at \$150.00 per acre.

No. 20. 117.19 acres by survey, 1 mile from pike on macadam road, large residence, new tobacco barn, stock barn, good land, limestone soil, a bargain at \$11,000.

No. 21. 147 acres 1½ miles from town on pike, fair improvements, good land, very productive, partly rolling, can be divided, price as a whole, \$80.00 per acre.

No. 22. 60 acres, on pike 4½ miles from Lancaster, good land all in grass, 6 room dwelling, stock barn, tobacco barn and other out buildings, improvements all new, \$5,000.00.
